FEATURES

Android Custom ROM Devices

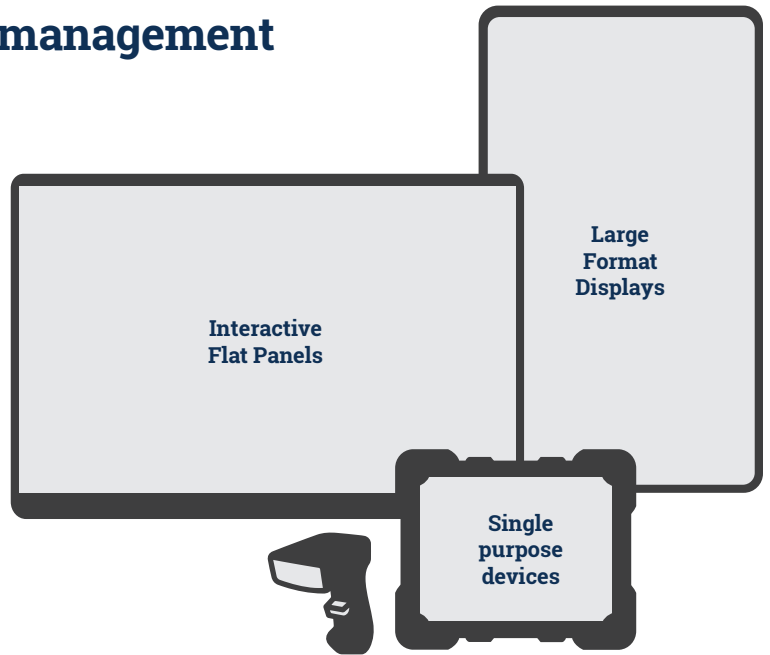

Android Custom ROM devices management

With Chimpa MDM you have all the tools needed to **manage Android Custom ROM devices***.

Custom ROM devices include, for example, Large Format Displays for digital signage, Interactive Flat Panels for education, retail monitors, single purpose devices for bars and restaurants, industry rugged devices etc.

Please note that **most manufacturers set specific limitations on the operating system and on the hardware: we therefore reserve the right to verify the compatibility of the Chimpa MDM features with the customer's device.**

* Android distributions without Google Play Services

What you need, when you need it

Thanks to its modular approach, Chimpa allows you to build a solution perfectly fit for your organization. With Chimpa you can choose the services you really need, leaving the door open to further expansions.

EDU

This module is integrated with the most popular education suites, such as Apple School Manager for iOS and Google Classroom for Android.

MAM

The Mobile Application Management module includes all the tools you need for a massive Apps, resources and contents deployment, along with the corresponding license management.

STANDARD

The 'Essential MDM Toolkit' has everything you need to enroll and manage all the iOS and Android devices within your organization.

ADVANCED

This module gives you productivity-focused tools, making it the best solution for any kind of business aware of the GDPR-related needs of work/personal data management.

ANALYTICS

This module is an essential tool for your organization if your main concern is about safety management, maintenance and App or network usage data gathering.

Standard Licenses

To make things easier when it comes to create the perfect module mix, we prepared a set of license packages including the essential device management tools depending upon your organization and needs. In the following scheme you could find, corresponding to each license, the modules composing it. Of course you can create any kind of tailor-made license including any module you need!

		MODULES				
		STANDARD	EDU	ADVANCED	MAM	ANALYTICS
LICENSES	Chimpa Business					
	Chimpa Business Premium					
	Chimpa School					
	Chimpa School Premium					

GENERAL FEATURES

		STANDARD	EDU	ADVANCED	MAM	ANALYTICS
